

# Using Your OneSky Camera Phone Adapter

1. Install adapter onto 10mm Super eyepiece as shown, rolling down the rubber eyecup on the eyepiece first

2. Insert eyepiece+adapter assembly into telescope focuser as normal
3. Look through eyepiece and focus normally
4. Start camera app on your mobile phone, making sure to turn OFF the flash
5. Place mobile phone flat against flat face of adapter and slide around until camera lens is over adapter hole
6. Take the picture!
